Chapter Overview 3

1. Sketching graphs

Cubic, quartic and reciprocal functions: roots, intercepts, repeated roots and end behaviour.

2. Points of intersection

Connect graphical intersections with simultaneous equations.

3. Transformations

Translate, stretch and reflect graphs. Track points, intercepts and asymptotes.

Polynomial Graphs 4

A polynomial has nonnegative integer powers of x:

$a + bx + cx^2 + dx^3 + ex^4 + \cdots$
